Replay

Made from 100% Post-Consumer Recycled Flame Retardant Polyester, in 33 colourways

Made to move

Inspired by sportswear, RePlay fuses the flexibility of a trainer with the performance of an athlete. A knitted appearance in a woven fabric, together with two-tone micro colour detail, creates a futuristic look that is straight out of the sports arena, onto furniture. Made from 100% post-consumer recycled polyester and TCPP free, RePlay is future thinking, forward moving, and environmentally intelligent.

A cellular, knitted aesthetic

Made for the hybrid world, RePlay blurs boundaries and enjoys doing it. It's here for the office at home, the workspace in the city, and the collaborative hub that's anywhere in-between. With its cellular, knitted aesthetic and subtle surface texture, this fabric brings a contemporary look and feel to any, and every, space.

Fun, flexible, and functional

A fabric with moveability and stretchability, RePlay is as fun to work with as its name suggests. A recycled polyester that makes for easy upholstery while meeting the highest of durability standards, this fabric is hard working - and deceptively easy going.

An eco-friendly fabric

Free from the halogenated fire-retardant TCPP, and achieving flame retardancy to Crib 5 Medium Hazard and M1/B1, RePlay is as safe as can be, on all counts. Meeting a range of environmental certifications, including the EU Ecolabel, and woven entirely from recycled plastic bottles, this fabric is doing its part to protect both human health and the wider world.

Playful palette

A 33-shade colour palette filled with personality, RePlay flips between the bold brights of an extrovert to the muted tones of an introvert, without missing a beat. It has the bestselling shades you know and love, trend-led hues with an eye on the future, and the timeless neutrals you can't live without. A complex dye technique creates a multi-layered colouration which brings an appealing depth to each shade, and a two-tone detail for the smartest of finishes.

At a glance

- Made from recycled plastic bottles
- Flame retardant to M1/B1 and Crib 5 Medium Hazard
- Free from the halogenated fire-retardant TCPP
- Smart, two-tone colour detail
